

ELEMENTARY LEVEL CHART OF ACCEPTABLE COURSES

to satisfy the prerequisites for the elementary level

This chart does not necessarily include every course equivalent available at the institutions named, but provides a sampling of appropriate courses. These courses reflect current transfer courses—other courses may previously have been acceptable in satisfying the prerequisites. Please call the PDP Admissions Office if you have questions relating to this chart.

The laboratory science prerequisite must contain a lab component from acceptable subject areas in Biology, Chemistry, Physics and Physical Geography—it may be necessary to take a separate lab course.
